

SANSKRUTI RAKA

Software Engineer | Java | Spring Boot | REST APIs | SQL

9322164303 | sanskrutiraka1602@gmail.com | Pune, Maharashtra, India

LinkedIn: <https://www.linkedin.com/in/sanskriti-raka-105789261> | GitHub: <https://github.com/Sanskrutiraka>

PROFESSIONAL SUMMARY

MCA graduate and Software Development Intern with hands-on experience developing and testing software applications across backend, API, database, and mobile application layers. Experience with Java, Spring Boot, REST APIs, SQL, React Native, Node.js, PostgreSQL/Supabase, third-party API integration, testing, Git, and Agile development. Developed Java/Spring Boot applications involving REST APIs, database integration, authentication, CRUD operations, and asynchronous processing with Apache Kafka.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Core, Node.js, REST APIs, CRUD, API Integration, JSON, IoC, Dependency Injection

Frontend: React.js, React Native (Expo), HTML, CSS

Database: MySQL, PostgreSQL, Supabase, JPA, Hibernate

Messaging: Apache Kafka

Testing: Unit Testing, Integration Testing, API Testing, Postman, Debugging

Tools: Git, GitHub, Docker, Swagger, IntelliJ IDEA, VS Code

Engineering: OOP, SDLC, Agile/Scrum, Version Control, Documentation

PROFESSIONAL EXPERIENCE

AmbuGrid System LLP | Software Development Intern

June 2026 – Present

- Develop and enhance features for a cross-platform Parking Management System using React Native (Expo), Node.js, Supabase/PostgreSQL, and REST APIs.
- Work with REST APIs and backend-integrated application workflows to implement and validate application features.
- Integrate third-party services including Maps, Vehicle Verification, and Razorpay payment gateway.
- Perform unit testing, integration testing, API testing, debugging, feature validation, and defect reporting.
- Evaluate APIs, document integration requirements, and support feature enhancements.
- Collaborate with a six-member Agile development team using Git-based version control.

PROJECTS

1. CivicPulse+ – AI-Powered Smart Grievance Management System

Tech Stack: Java, Spring Boot, React.js, SQL, Docker, REST APIs

- Developed a full-stack grievance management application using Java, Spring Boot, React.js, and SQL.
- Developed RESTful backend APIs for complaint registration, tracking, authentication, and user management.
- Implemented AI-assisted complaint routing and categorization for automated grievance workflows.
- Integrated backend services with a relational SQL database and developed application dashboards.
- Used Docker, Git, Postman, and API testing during development.

2. Smart Complaint Routing System

Tech Stack: Java, Spring Boot, React.js, SQL, Apache Kafka, REST APIs

- Developed a complaint management application using Java and Spring Boot with automated routing and status-management workflows.
- Built REST APIs for complaint assignment, tracking, and status management.
- Integrated Apache Kafka for asynchronous complaint processing and workflow events.
- Connected backend services with a relational SQL database.
- Performed API testing, debugging, and version control using Postman and Git.

EDUCATION

Master of Computer Applications (MCA)

2024–2026

Sinhgad Institute of Management, Vadgaon | Savitribai Phule University | CGPA: 8.75

Bachelor of Science (BSc)

2019–2022

Padmashri Vikhe Patil College of Arts, Commerce and Science, Pravaranagar | Savitribai Phule University | CGPA: 8.9

CERTIFICATIONS

- Programming in Java (Elite) – NPTEL, IIT Kharagpur
- EDGE Java Course – Fortune Cloud Technologies Group
- Software Engineering Job Simulation – Accenture (Forage)
- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
